

The County of Morris Office of Information Technology
presents a shared service opportunity for:

Digital Property Tax Map Preparation and Maintenance

ADMINISTERED BY:
Morris County Office of Information Technology, GIS Section
30 Schuyler Place, Morristown, New Jersey 07963

Morris County's GIS Section is proud to present the opportunity to all Morris County Municipalities to enter into a shared service contract to coordinate with NJ Professional Licensed Surveyors for the preparation and/or maintenance of property tax maps. New or updated tax maps prepared for your Municipality will comply with current Division of Taxation standards as well as upcoming digital mapping standards.

In addition to coordinating regular maintenance and map support, the County will publish the digital Tax Map information as an interactive online mapping application. This application can be made available for public or private (secure login required for access) use at the discretion of the Municipality and can be used as an information management tool for day-to-day decision making and planning.

The digital maps will offer improvements in real estate valuation assessments and will be synchronized with MOD IV data. The digital maps will also offer greater efficiency and cost savings to the Municipality and will improve other mapping projects beyond tax maps in areas such as Zoning, Land Use or Open Space.
